Chapter 23. The Destruction Of Atlantis. Activities Of The Inhabitants On The Morning The Island Sank Into The Ocean

I tell the story in all truth as it was told to me: A general of that age when Thought did rule, so planned and taught that from a solitary point of Earth—this very land,¹⁵ ye speak, those warriors, men, were sent long ages since.

And yet ye speak: "In old barbaric days!"

On other planets that which hath no form, but is a force on earth, takes shape and substance, too, in time.

And to the eyes of Mars' men grows the shape or body. This is Law. A science of the matter formed in cloud on other planes or planets where the growth law differs from our own of earth.

Where vapor forms in whorls and added growth makes spirals, branching, that which to our eyes is but the mist which sun drinks.

¹⁵ America.
